### LOCAL NOTINGS

The Manitoba Free Press has the following to say regarding Strathmore's exhibit at the Dry-Farming Congress—  
Rich in grain and vegetables, Strathmore has chosen a wheat of wheat to display the riches of the district and it shows to advantage.

The Strathmore Standard issued a handsome illustrated publicity number which reached our exchange table last week. The paper shows that great care was exercised in its compilation and will be sure to bring results. Bro. McKenzie is deserving of congratulations.—Mail, Munson

Miss Jenny Windsor, of Strathmore, has recently joined the Bessano telephone exchange staff.

We have received from Mr. Russell J. Cuthbertson, of Strathmore, Alta., a copy of the Standard of that town, and it is a credit to the enterprising editor. It is an eight page paper, printed on fine calendered paper, and contains a number of interesting cuts and an extensive write-up of the town and vicinity. Strathmore is in the Bow Valley, the crops there this year have been good. Mr. Cuthbertson is in the Union Bank there and he says there is a good future ahead of that town.—Expositor, Perth, Ontario.

The Metropolitan Ladies' Orchestra of Chicago is to appear in the Opera House on Monday next, Oct. 28th. This promises to be one of the best musical entertainments yet presented here. The fact that John Congrove of Winnipeg has sent this company to Strathmore is sufficient evidence that it will be the highest, so far as he has never sent out any companies that were not of the highest merit.

P. C. Barnard Hervey, recently appointed chief superintendent of Dominion parks, has left Calgary for Edmonton, where his headquarters will be for the future. Mr. Hervey was formerly resident engineer on the irrigation construction work on the Western Section of the Bow Valley and located at Strathmore.

Mr. Oscar Miller, the well-known breeder of Jersey Swine, has, we understand, bought the farm one mile west of town known as the W. H. Smith farm. The seller was Mr. W. H. Smith, who came up this spring from the U.S., but who finds that business matters have necessitated his remaining south of the line, for some time at least.

Mr. Miller's present farm is located near Cheadle. He has specialised on pedigree Duroc Jersey hogs, and has been very successful in his operations.

Dr. Richard Waddy, (M.R.C. V.S., M.V.M.A.), taking up the veterinary practice here vacated by his brother, Dr. C. E. Waddy, who left some weeks ago to take up an appointment with the Dominion Government at Regina. The new practitioner was for some years a veterinary surgeon with the R.N.W.M.F. at Macleod, and has lately been in private practice there. Dr. and Mrs. Waddy arrived here last week, and he has now taken up practice. The Waddy family have been associated with Strathmore as long as the town's history, and Dr. Waddy will find a hearty welcome here.

### The Grain Harvest

The present is the first week in several that threshing has progressed uninterruptedly without any interference from the weather, which has been sunny though somewhat cold at night, during the whole of that period.

Reports indicate that the crop will be a good average, though there are not many exceptional yields.

Mr. F. R. Lilly, of the Alberta Pacific Elevator, reports that he has taken up-to-date 18,000 bushels and that grain is now coming in at a rate of 2,000 bushels per day.

The Imperial Elevator, which re-opened only recently, reports through the local agent, Mr. Lehigh, that it has taken up about 2,000 bushels.

The Export Elevator, which is now owned by the Robin Hood Milling Company, and the local agent for which is Mr. Zerkle, reports that up to yesterday it had taken in 19,000 bushels.

Four cars of grain have been shipped direct from the loading platform, making a total of 43,000 bushels marketed to yesterday morning.

We have not yet got the figures for Cheadle, Namaka, Nightingale, and Tudor, but these points have all shipped considerable amounts of grain.

According to the elevator men, the grain movement has only really just begun, and some of the grain being brought in has hardly properly dried, so that elevators are not advising the farmers to rush their grain to market.

The largest yield yet reported in this district is from the farm of Mr. Twilker, south of the river, whose wheat yield averaged 52 bushels to the acre, and Mr. Thompson, in the same neighborhood, whose oats went 110 bushels to the acre.

Mr. Geo. Kennedy, farming near Tudor, informs us that he has finished threshing, and realized 16,400 bushels of grain off 300 acres. From 120 acres in wheat he harvested 280 bushels, an average of 27 bushels per acre. Part of it averaged 35, but other sections were lighter. From 120 acres of oats he threshed 10,000 bushels, averaging 67 bushels to the acre. In this case the stubble was burnt off in the spring, and the land dressed twice. From 70 acres of barley he threshed 2600 bushels, an average of 39½ bushels to the acre. The grain in all cases was very good.

The oat crop on the Demonstration Farm, which is now being threshed, is yielding about 85 bushels to the acre.

Mr. W. A. Miller, St. Paul, who has considerable land in the district, and is farming it through renters, reports that on one of his farms 130 acres of flax yielded a return of 14 bushels to the acre. His wheat averaged 25 bushels to the acre.

Mr. C. V. Vanscoy has threshed an average of 40 bushels to the acre from 18 acres of winter wheat. Mr. Harold B. Brown's wheat went 30 bushels to the acre, and Mr. A. Stein's 31.

Cap. P. J. Daly reports as follows:

I have about 40,000 bushels threshed (oats, barley and wheat) out about 17,000, very good quality average about 60 bushels to the acre.

6,000 bushels barley, fair quality. Grain good but discolored with too much rain.

17,000 bushels wheat average about 17 bushels, grade about two, fairly good.

Sedgewick district I have 10,000 bushels wheat threshed, good quality, grade 2.

Rison Bros. state,

We have no very big yields to report this year so far. We have threshed a few oats which turned out pretty well. We don't think wheat generally has come up to the farmer's expectations, although in some cases the quality is a couple of grades better than last year.

Labor is scarce, and some of the threshing outfits are working short of their complement of teams and men. There is enough work in sight to keep the threshing machines busy for at least three weeks yet, providing the weather keeps.

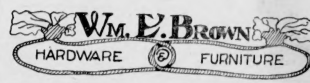

Between now and 10 per cent. of the crop is now estimated to have been threshed. Some farmers are stacking, but most of them are taking chances on the weather keeping good, and leaving their grain in stack till the threshers come along. Several new machines were unloaded here since last week.

Several delegates from the Dry-Farming Congress visited Strathmore this week.

You will find exactly what you have been planning in the way of a stove or a range at this store at your own price

It was also stated that the new steamships would be equipped with all the other latest devices making for safety, such as wireless apparatus, search lights, submarine signals, and from the very moment they are assembled, the members of the crews will be trained in the life saving, fire and other drills, which are a feature of all this Company's steamships.

**Monday, October 28, is Thanksgiving Day, and consequently an official holiday. All stores, banks, etc., will be closed for the day.**

WILLIAM SIMPSON

Although I broke a law outside the pen I won't break one inside. I will do any other work they want me to do."

They are building a "special punishment" cell for him—a steel cage just big enough for a man to stand up in, but not to sit down.

"Simpson will have to stay in it until he decides to do the work we tell him to do."
